

EmployAbility

Spinal Cord Injuries Australia

Empowering people
with physical disability

What is EmployAbility?

EmployAbility is our specialised employment service that empowers people with physical disability to lead more independent and inclusive lives by supporting them to aspire to, prepare for and engage in meaningful work or opportunity; while helping our employer partners to access an untapped source of talent to strengthen their diversity and inclusiveness.

How does it help people with physical disability?

Our EmployAbility program empowers people with physical disability to lead more independent and inclusive lives. It does this by using employment coaches with lived experience to guide people with physical disability through a specialised, online employment program with the goal of developing the skills and mindset that will secure meaningful work with an employer partner or in our own social enterprise.

The EmployAbility job search journey

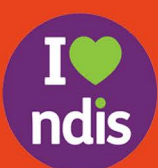

Key benefits

Some key benefits of the EmployAbility program include;

- o Developed by our working group with lived experience disability
