

Ageing with Spinal Cord Injury Invitation to Participate – Health Professionals

Health professionals who are currently or have previously worked with people growing older with spinal cord injury (SCI) are invited to participate in a research project investigating their experience.

Participation involves:

- Completion of a short online survey
- Opportunity to participate in a one-hour online interview

This study aims to facilitate people with SCI to age well by:

- Informing health policy in the areas of support and service provision
- Providing recommendations for resources / education programs
